Eco-Ready™ fleets

70
YEARS

GLOBAL LEADER IN CLEAN
TRANSPORTATION SOLUTIONS

3

Over 70 years, we have been providing real and effective solutions to the challenges of environmental sustainability

Landi Renzo is the global leader in ecological mobility

Landi Renzo is the pioneering global leader in ecological mobility. We develop advanced technologies for the automotive industry that actively contributes to a more sustainable environment.

From our US technology and innovation center in California, to our network of partners across the country, Landi provides commercial and municipal fleets, dealers, and fleet management companies with efficient, clean transportation technologies, through a simplified and reliable logistics supply chain.

Providing technologies along the entire clean energy value chain

Landi believes world development is driven by the production and use of clean energy. Guided by our mission to protect the environment, we continuously invest in, develop, and promote clean technology solutions that span the entire energy value chain—generation, compression, storage, and distribution.

Landi Renzo USA engineers, manufactures, installs, and maintains sustainable fuel systems for OEM work trucks

Connecting municipal and commercial fleets with effective, clean transportation technologies

-  #1 in Global Distribution
-  Operating in 100+ Counties
-  Thousands of Units in Operation
-  CARB & EPA-certified Products
-  OEM Quality and Reliability
-  Best Warranty – 3 Yrs. / 50,000 Miles

 **3 YEAR/
50,000 MILE
WARRANTY**

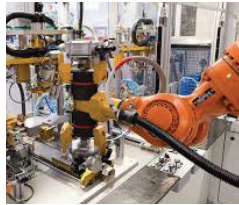

Global scale and stability

For seven decades, Landi has advanced proven, effective technologies to meet the challenge of environmental sustainability. Operating in 100+ countries on five continents, we are the world leader in the design and integration of commercial fleet and passenger vehicle systems powered by eco-friendly fuels.

Innovation

Landi Renzo USA engineers, manufactures, and installs compressed natural gas (CNG), renewable natural gas (RNG), and hydrogen (H2) fuel cell systems for OEM vehicles. With more than 91 global patents, our innovation-driven approach breaks new ground and opens sustainable new horizons for U.S.-based commercial fleets.

Environmentally friendly

Our technologies help lower fleet emissions and reduce environmental impact. As the sustainable system developer and installer with the largest line-up of CARB and EPA-certified vehicles, we enable fleets to meet sustainability goals, state and local mandates, and secure grants through our CNG, RNG, and H2 systems.

Safety

As a Manufacturer of Record, we are accountable for ensuring our systems meet emissions requirements. In addition, our testing ensures compliance with FMVSS requirements. We offer an industry-leading 3 Years / 50,000 Miles warranty on our clean transportation systems and components, which are designed, developed, and integrated in collaboration with OEMs.

Landi Renzo USA offers the best warranty in the business on CNG vehicle systems. Plus, the original Ford warranty remains intact for the powertrain and the base vehicle.

Pioneering the road to zero emissions

H²

Fuel Cell Electric Vehicle

With the recent passage of trailblazing Advanced Clean Car rules, the California Air Resources Board (CARB) requires all new light trucks sold in California to be zero-emissions, starting in 2035. Landi is well-positioned to help commercial and municipal fleets meet zero-emissions mandates.

Landi Renzo has been developing and testing hydrogen fuel cell technology and products. Our forward-thinking approach and highest standards for component quality provide fleets with a time-tested and reliable partner to support their transportation energy transition.

With facilities ready to support hydrogen fuel cell systems production and continuous investments in advanced technologies, Landi Renzo is ready and able to help repower America's work truck fleets.

OEM work trucks with clean transportation fuel technologies

Light Duty

Super Duty

Medium Duty

Shuttle Bus

Stripped Chassis

Landi clean fuel technology systems are also available for sale, installation, and service through our nationwide distribution network of professional installers.
